BRISBANE, B.10. 5th. January 1937.

Professor Joseph R. Slevin,

"Kolonga" Station,

GIN GIN. Q.

Dear Professor,

Your letter of the 25th. December reached me a few days ago after my return from Springbrook, where we had a very happy time. Had you not been able to connect with Mr. Campbell, we would certainly have brought you up with us.

Despite the bush fires, there seemed to be more lizard life than when we were there, due probably to the fact that the undergrowth has been burnt out and they are more easily seen. We even got a couple of bush mullet in the woodheap at the back of the house.

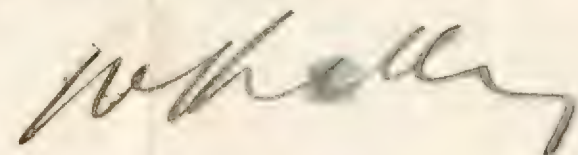

I hope that you will have a very successful "hunt" at Gin Gin, and that you will be pleased with the result.

We shall be looking forward to seeing you about the 16th., and, no doubt, may be able to get some specimens round about Darra.

The family will be going up to Springbrook shortly, and on account of the rains there are a number of frogs about. Would it be of any assistance to you if they were to get a few and keep them alive ?

With kindest regards.

Yours sincerely,

BRISBANE
